09-JUL-FR	09-JUL	09	FR	Watch	Casio	Casio Watch	\$100.00	20	Accessories

1. Handling Missing Values

As the data is missing in price column I used the formulae : IF(ISBLANK(D7),"NA",D7) and i got the correct output and all the missing values been filled with NA as expected.

2. Correcting inconsistent data

Changed the text to PROPER format in product name column

Secondly, changed ELECTRONI to ELECTRONICS by using FIND & REPLACE method in category column

3. Removing duplicates

No duplicates found with entirety of each row and for product id no duplicates should be removed as same products can be purchased by different customer in different dates

4.Split Manufacturing date

I have used formulae : =LEFT([@[Product ID]],2) to get the appropriate information

Country Code

I have used formulae : =RIGHT([@[Product ID]],2) to get the appropriate information

Merge the "Brand Name" and "Product Name"

I have created a dupe column and used formulae =Concatenate(F2," ",E2) nad received an expected result

5. Number formatting

Chaged Price column to a currency format by using home ribbon

Manufacturing date

In data sheet no year found so is have worked only with given data which is dd mm yyyy so for this i have used left function and splitted the date and mid function and splitted the month in duplicate columns. And used the formulae Concatenate to merge both date and month and given string in double quotation

6.Conditional Formating

Highlighted the Electronics in Red colour by using the ribbon which is conditional formatting in home tab as available in online excel

Highlighted Price column using Color Scales in conditional formatting ribbon as per requirements
